

Information security policy

At Nudge Labs d.o.o. we are aware of our responsibility to ensure the protection of information in our work and dealings with suppliers and customers.

The objectives of the information protection policy are:

- ensuring the protection of information in product development processes,
- ensuring the protection of information in the performance of customer services,
- ensuring quality treatment of information from all participating customers in the operation and business of the company,
- prudent and professional handling of information (public information, internal information, and confidential information),
- ensuring business continuity by using cloud services and limiting business damage to the minimum possible by preventing and reducing the consequences of security incidents,
- ensuring a high awareness of all employees about security risks and methods of protection.

The purpose of the information protection policy is to determine the importance of information for the company's operations and to protect it accordingly in terms of ensuring confidentiality, integrity, and availability:

- confidentiality: ensure access to information only to authorized persons,
- integrity: protecting the accuracy and completeness of information by preventing unauthorized changes,
- availability: ensuring that authorized persons have access to information and related resources when they need it.
